

# Portraits

## About Us

With many years of photography experience, John Fitzgerald loves to capture images that you and your family can treasure forever. Whether it is a special occasion or just for memories, he can help you transform your ideas into images.

We have a studio available if you would like a simple coloured background for your images and we have parking opposite . All of your images are stored on our premises and are printed at our laboratory in St Martins.

Seasonal Portrait promotions are often available and can be booked over the phone or online, so please check [www.fitzgeralds.co.gg](http://www.fitzgeralds.co.gg) for more information.

You may wish to purchase a gift voucher for a family member or friend - these are available to purchase instore. Vouchers can be created for any amount, or products and services. Please do call 231555 to arrange your voucher.

## Studio Portraits

Every Portrait is unique, and it is important to us to create beautiful memories for you to enjoy. Our studio is suitable for up to 5 people whether a group of friends or a family. We welcome newborns into our studio and for you to bring along any items that you would like to make the images personal to you.

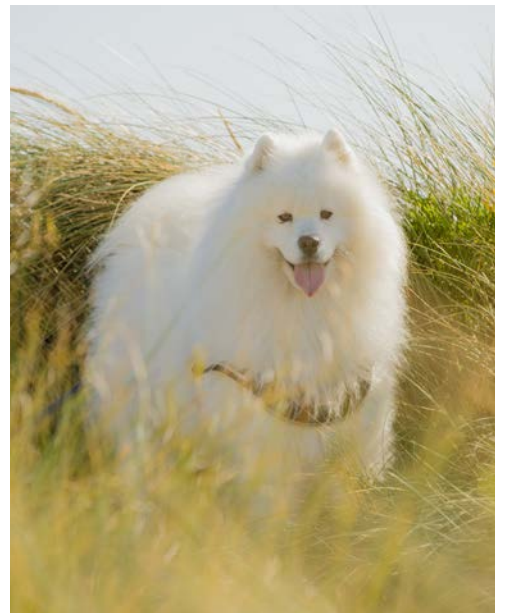

After your portrait photographs have been taken, your images will be displayed in a private online gallery, enabling you to view and order at your leisure, or you can arrange an appointment to view the images at our studio.

*"We love our photographs and are  
so pleased we chose an album to  
share with our family."*

## Location Portraits

With so many beautiful locations to choose from in Guernsey, we are here to help guide you to the perfect place to capture your family portrait. John's experience with natural light and his ability to make even the most ordinary of backdrops sparkle, will help create amazing photographs, perfect for wall art to display in your home. Pets are very much part of the family and we welcome them to join you for your Location sitting, or even on their own.

His calm, innovative style produces stunning portraiture at anytime although his preference is for the early morning misty light or during the golden light of late afternoon.

*"The children had such  
fun with John.  
We are so delighted with our  
album and canvas wraps."*

If on the day of your portrait session the weather looks unfavourable, we will simply reschedule for a different date or change locations. If someone is unwell in the lead up to or on the day of your session, please contact us at the earliest opportunity to reschedule. We will happily move your session to a suitable time ensuring everyone is feeling at their best.

If you have any special requirements or favourite locations then please discuss with us prior to your portrait session.

# Teen and Young Adult Portraits

The progression from child to adulthood is a beautiful stage to capture photographically. John specialises in pre-university portraits highlighting the transition from leaving school to embarking adult life.

These sessions illustrate a range of beautiful images, displaying your personality and celebrating who you are.

# Timeline

## Booking your Portrait

Once you have made the decision to book a portrait session with John, you may choose whether you would like a studio or location portrait. Consider everyone involved and whether they would prefer the more formal yet intimate studio, or the freedom of a location portrait on a beach, cliffs or even at home. We can help with recommendations, and will of course take wind direction and tide times into consideration. We will ask for details of who will be involved in your portrait session and confirm your date, time and chosen location. We can also suggest locations that are easily accessible.

## On the Day

We will contact you a day or so before your portrait to confirm details including checking weather forecasts. On the actual day you will meet with John at a pre-determined time and place- he will be the one with the camera!

## Viewing your Images

John personally edits and prepares each of the photographs taken. They are then uploaded to a private gallery on our website for you to view and order at your leisure. We also offer viewing appointments at our studio should you wish to discuss our wall art options.

## Your Order

All orders are prepared personally by John ensuring the highest quality of finished product. We print all photographs and wall art products at our photographic laboratory, with larger products being finished by hand by our Guernsey framers. Most products are available within two weeks although albums will take longer and are created in full consultation with you.

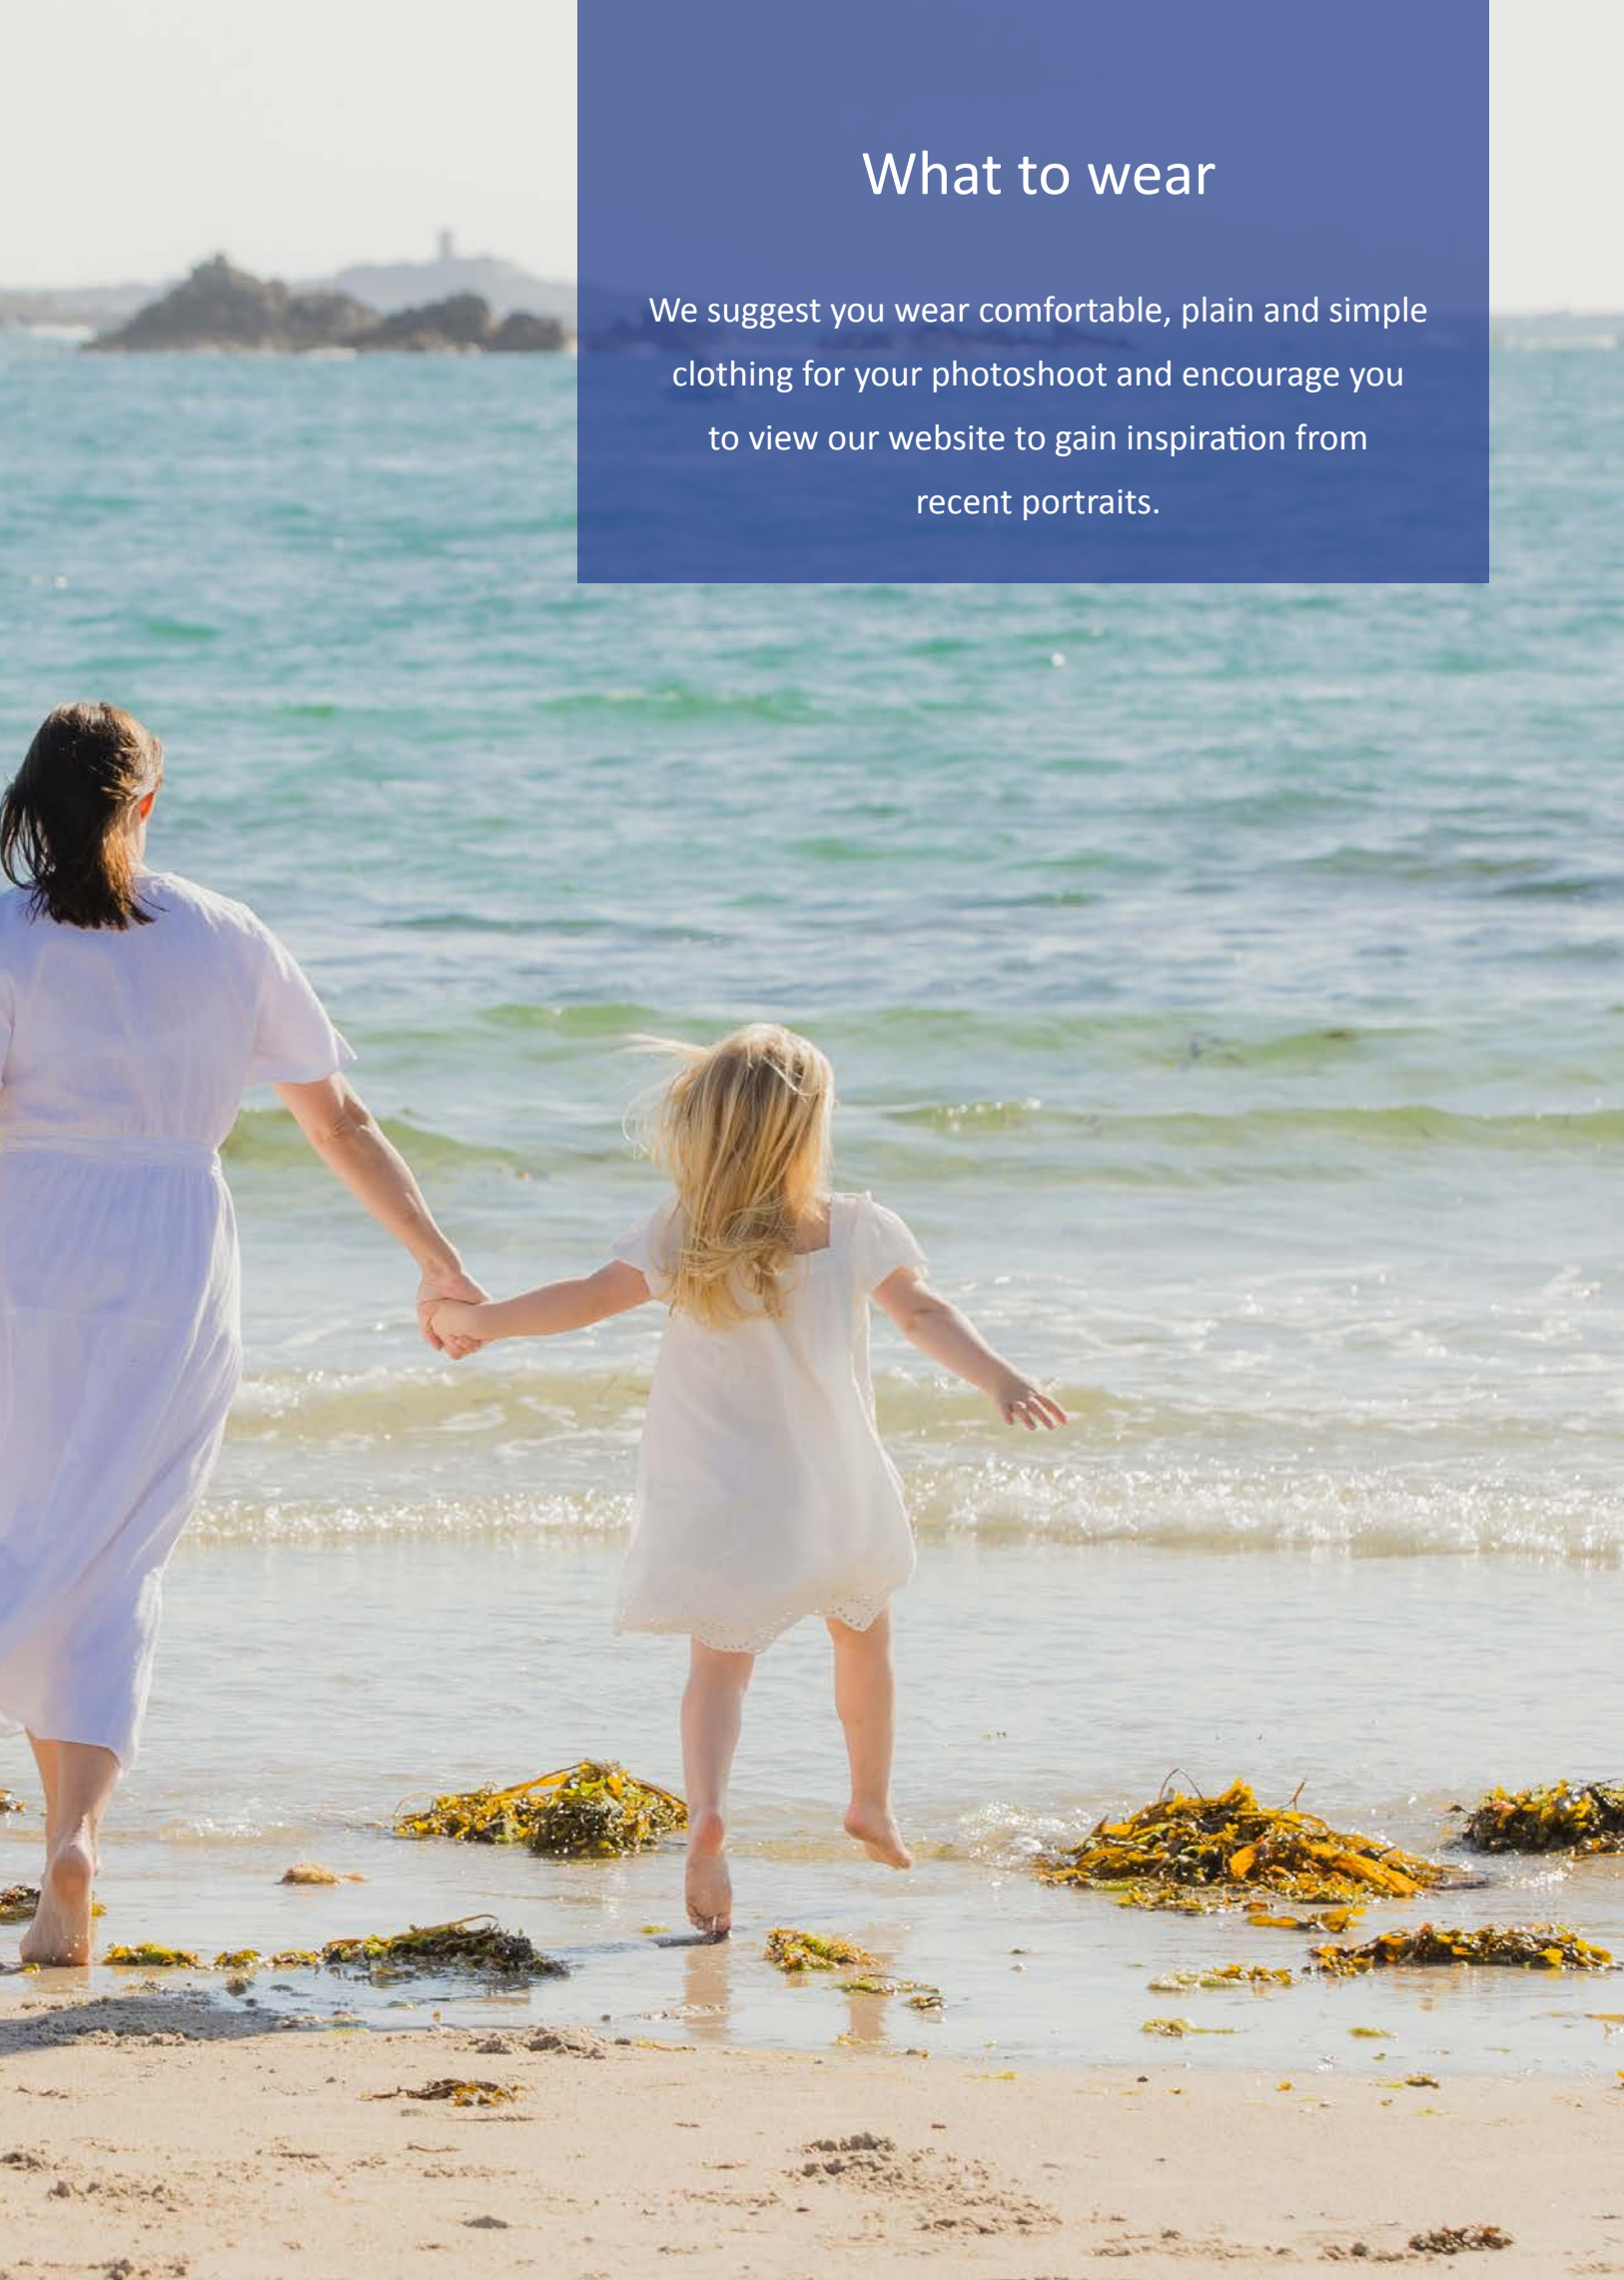

## What to wear

We suggest you wear comfortable, plain and simple clothing for your photoshoot and encourage you to view our website to gain inspiration from recent portraits.

# Product Guide

Please browse through our guide and prices prior to placing your Portrait order. You are welcome to visit us instore Monday to Friday, 8:30am- 4:00pm to view samples of our products or to discuss your requirements for your order.

## Professional Prints

Your chosen prints are provided in a free standing black mount, ideal to give as a gift or put straight into a frame.

We have a range of ready made frames available in store in all sizes.

## Drymounted Prints

Our larger images will be printed and drymounted onto a lightweight card. They are able to be put straight into a frame or professionally mounted and framed.

Having your image drymounted means that it will not ripple overtime in a frame.

## Albums

Clients love our portrait albums. They are the perfect way to preserve every single photo that you love. More than a book of photographs, it is the story of your family.

## Canvas Wraps

Your chosen image is printed on a high quality natural cotton canvas and is wrapped around a wooden frame resulting in a timeless classic.

All of our Canvas wraps are created and wrapped in store by John Fitzgerald.

## Digital Images

A digital image gives you the permission to share it on social media platforms, or print them in larger quantities to share amongst the family.

John would still own the copyright of the image, but it allows you permission to print and share the image in a high resolution. You can upload your digital image to [www.fitzlab.com](http://www.fitzlab.com) to print.
